**Plerixafor (AMD3100)**

**Cat. No.:** A2025  
**CAS No.:** 110078-46-1  
**Formula:** C28H54N8  
**M.Wt:** 502.78

**Synonyms:**  
**Target:** GPCR/G protein  
**Pathway:** CXCR  
**Storage:** Store at -20°C

**Solvent & Solubility**

≥25.14 mg/mL in EtOH; insoluble in DMSO;  
≥2.9 mg/mL in H2O with gentle warming

| Preparation method: | Limited solubility in DMSO. General tips for obtaining a higher concentration:  
Please warm the tube at 37°C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months. |
| Reacting conditions: | 2.5 mg/mL; 30 min |
### Applications
CXCR4 and SDF-1 were key factors in regulating cancer cell invasion and metastasis, and Plerixafor effectively prevented the binding of SDF-1 to CXCR4, inhibiting cancer metastasis.

### Animal experiment

</tr>
<tr>
<td>Dosage form</td>
<td>Cohorts of mice were administered with PBS, IGF1, PDGF, SCF or VEGF for five consecutive days and Plerixafor on the 5th day. The number and size of the colonies were highest in mice injected with IGF1 and Plerixafor than those treated with PDGF, SCF or VEGF plus Plerixafor.</td>
</tr>
<tr>
<td>Other notes</td>
<td>Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.</td>
</tr>
</tbody>
</table>

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
