Dovitinib (TKI-258, CHIR-258)

Cat. No.: A2168
CAS No.: 405169-16-6
Formula: C21H21FN6O
M.Wt: 392.43

Synonyms:
Target: Tyrosine Kinase
Pathway: FGFR
Storage: Store at -20°C

In Vitro

Preparing Stock Solutions

insoluble in H2O; insoluble in EtOH; ≥36.35 mg/mL in DMSO

Please refer to the solubility information to select the appropriate solvent.

Biological Activity

Multitargeted RTK inhibitor

IC<sub>50</sub> & Target
1 nM (FLT3), 2 nM (c-Kit), 8 nM (FGFR1), 8 nM (VEGFR3/FLT4), 9 nM (FGFR3), 10 nM (VEGFR1/FLT1)

Cell Viability Assay

Cell Line: Human multiple myeloma (MM) cell lines and B9 cells
Preparation method: The solubility of this compound in DMSO is >36.4mg/mL. General tips for obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.
Reacting conditions: 100 nM CHIR-258; 48-96 h.
Applications: Dovitinib is a receptor tyrosine kinases inhibitor. Dovitinib selectively inhibits the growth of human myeloma cell lines and B9 cells expressing wild-type (WT) or activated mutant FGFR3. Dovitinib also causes cytostatic and cytotoxic effects and inhibits downstream extracellular signal-regulated kinase (ERK) 1/2 phosphorylation.

<tr>
<th>Animal experiment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Animal models: 6- to 8-week-old female BNX mice bearing 3 x 10^7 KMS11 cells.</td>
</tr>
<tr>
<td>Dosage form: 10, 30, or 60 mg/kg for 21 days by gavage.</td>
</tr>
<tr>
<td>Applications: Dovitinib causes antitumor effect and inhibits tumor growths by 48%, 78.5%, and 94% in the 10 mg/kg, 30 mg/kg, and 60 mg/kg treatment arms, respectively. Weight loss, as a marker of significant toxicity, is not observed in any of the treatment groups. Dovitinib completely inhibits FGFR3 at the 60 mg/kg dose. CHIR-258 induces both cytostatic and cytotoxic responses.</td>
</tr>
<tr>
<td>Preparation method: Dissolved in dimethyl sulfoxide (DMSO) at a stock concentration of 20 mM. For animal experiments: formulated in 5 mM citrate buffer.</td>
</tr>
<tr>
<td>Other notes: Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.</td>
</tr>

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for
long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
