Product Name: ABT-263 (Navitoclax)

**Chemical Properties**

- **Product Name:** ABT-263 (Navitoclax)
- **Cas No.:** 923564-51-6
- **M.Wt:** 974.61
- **Formula:** C47H55ClF3N5O6S3
- **Synonyms:** Navitoclax, ABT-263, ABT263, ABT 263

**Chemical Name:** (R)-4-(4′-chloro-4,4-dimethyl-3,4,5,6-tetrahydro-[1,1′-biphenyl]-2-yl)methyl)piperazin-1-yl)-N-(4-((4-morpholino-1-(phenylthio)butan-2-yl)amino)-3-((trifluoromethyl)sulfonyl)phenyl)sulfonyl)benzamide

**Canonical SMILES:**

```
CC(CC1)(C)CC(N2CCN(C3=CC=C(C(N[CH]2)C(C5=CC=C(C(NS(C4=CC=C(N[C@@H](CSC5=CC=C(C5=CC=C(C6=CCOCC6)C(S(C(F)(F)(=O)=O)=C4)(=O)=O)=O)C=C3)CC2)=C1C7=CC=C(Cl)C=C7
```

**Solubility:** >48.7mg/mL in DMSO

**Storage:** Desiccate at -20°C

**General tips:** For obtaining a higher solubility, please warm the tube at 37°C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

**Shopping Condition:**
- Evaluation sample solution: ship with blue ice
- All other available size: ship with RT, or blue ice upon request

**Biological Activity**

- **Targets:** Bcl-2 Family
- **Pathways:** Apoptosis >> Bcl-2 Family

**Description:**

ABT-263 is an orally selective inhibitor of B-cell leukemia 2 (Bcl-2) family of proteins with potential antineoplastic activity. ABT-263 is a small molecular with the formula of C47H55ClF3N5O6S3 and Molecular Weight of 974. As a Bad-like Bh3 minetic, ABT-263 binds to Bcl-2 family proteins.
Bcl-2 family proteins Bcl-2, Bcl-xL and Bcl-w, disrupts the interaction between Bcl-2/Bcl-xL /Bcl-w and pro-apoptotic proteins such as Bim, Bad and Bak, which trigger the caspases-initiated cell death pathway to induce apoptosis.

## Protocol

### Cell experiment:

<table>
<thead>
<tr>
<th>Cell lines</th>
<th>Murine DO11.10 T-hybridoma cells expressing murine Bcl-2, Bcl-xL and Bcl-w proteins</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preparation method</td>
<td>The solubility of this compound in DMSO is &gt;10 mM. General tips for obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.</td>
</tr>
<tr>
<td>Reacting conditions</td>
<td>None specific suggestion</td>
</tr>
<tr>
<td>Applications</td>
<td>ABT-263 is an antitumor effector in preclinical and early clinical studies. It binds to Bcl-2, Bcl-xL, and Bcl-w in vitro, but only targets Bcl-2 in vivo. In human non-Hodgkin lymphomas, high expression of Bcl-2 sensitized to ABT-263 elevated proapoptotic Bim.</td>
</tr>
</tbody>

### Animal experiment [3]:

<table>
<thead>
<tr>
<th>Animal models</th>
<th>Immune-deficient NOD/SCID or NOD/SCID, ILγ receptor negative mice</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dosage form</td>
<td>Orally taken at 100 mg/kg/day for 21 days</td>
</tr>
<tr>
<td>Applications</td>
<td>ABT-263 can largely inhibited the activity of patient-derived pediatric acute lymphoblastic leukemia xenograft. ABT-263 sensitivity was correlated with low MCL1 mRNA expression levels. BH3 profiling revealed that resistance to ABT-263 correlated with mitochondrial priming by NOXA peptide.</td>
</tr>
<tr>
<td>Other notes</td>
<td>Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.</td>
</tr>
</tbody>
</table>

Product Validation

ABT-737, or ABT-263 at the indicated doses for 24 hours. Survival data are shown for transitional B cells (n = 3 mice for each genotype) and are the results of 3 independent experiments, each performed in triplicate. Experiments depicted in panels C and D were performed concurrently. Values represent mean ± SEM.

As an inhibitor of Bcl-2, ABT263 is effective to reduce cell viability in HG3-CLL cells. Incubating the cells with ABT263 in 96 well plates (3×10^4 cells per well) for 24h shows a dose-dependent inhibition of cell viability with EC50 value of 2μM.[Source: Istituto di Scienze dell’Alimentazione]

Specific storage and handling information for each product is indicated on the product datasheet.
Most ApexBio products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
