

Product Name: SCH 527123 Revision Date: 01/10/2021

Product Data Sheet

SCH 527123

Cat. No.: A3802

CAS No.: 473727-83-2 Formula: C21H23N3O5

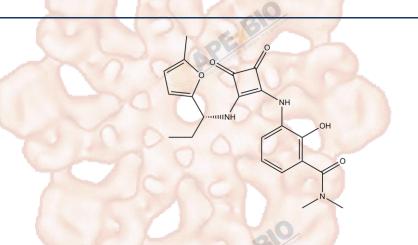

M.Wt: 397.42

Synonyms: SCH-527123;SCH527123

Target: GPCR/G protein

Pathway: CXCR

Storage: Store at -20°C

Solvent & Solubility

insoluble in H2O; ≥103 mg/mL in EtOH with ultrasonic; ≥19.85 mg/mL in DMSO

In Vitro

In Vitro

Preparing Stock Solutions	Solvent Concentration	1mg	5mg	10mg
Stock Solutions	1 mM	2.5162 mL	12.5811 mL	25.1623 mL
810	5 mM	0.5032 mL	2.5162 mL	5.0325 mL
REMARKS	10 mM	0.2516 mL	1.2581 mL	2.5162 mL

Please refer to the solubility information to select the appropriate solvent.

Biological Activity

Snortsummary	CXCR1 and CXCR2 receptors antagonis

IC₅₀ & Target 42 nM (CXCR1), 3 nM (CXCR2)

Cell Viability Assay

Con Trability Accay	
Cell Line:	Human melanoma cell line (A375SM)
Preparation method:	The solubility of this compound in DMSO is >10 mM. General tips for obtaining
	a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or
	shake it in the ultrasonic bath for a while. Stock solution can be stored below
	-20°C for several months.
Reacting conditions:	1 μg/ml, 72h
	A Lucinia and Lucinia

Applications: SCH-479833 or SCH 527123 inhibited the melanoma cell proliferation, chemotaxis, and invasive potentialin vitro. Treatment of melanoma cells with SCH-479833 or SCH 527123 also inhibited tumor growth. Histologic and histochemical analyses showed significant (P<0.05) decreases in tumor cell proliferation and microvessel density in tumors. Moreover, we observed a significant increase in melanoma cell apoptosis in SCH-479833- or SCH 527123-treated animals compared with controls. Animal experiment Animal models: Male BALB/c mice, 20-25 g Dosage form: Sch-527123 was suspended in 0.4% methylcellulose Applications: Sch 527123 was bound with high affinity to the CXCR2 receptors of mouse (Kd=0.20 nM), rat (Kd=0.20 nM), and cynomolgus monkey (Kd=0.08 nM) and was a potent antagonist of CXCR2-mediated chemotaxis (IC50-3– 6 nM). In contrast, Sch 527123 bound to cynomolgus CXCR1 with lesser affinity (Kd=41 nM) and weakly inhibited cynomolgus CXCR1 with lesser affinity (Kd=41 nM) and weakly inhibited cynomolgus CXCR1 mediated chemotaxis (IC50 ~1000 nM). Oral treatment with Sch-527123 blocked pulmonary neutrophilia (ED50=1.2 mg/kg) and gobiet cell hyperplasia (32–38% inhibition at 1–3 mg/kg) in mice following the intranasal lipopolysaccharide (LPS) administration. In rats, Sch-527123 suppressed the pulmonary neutrophilia (ED50=1.8 mg/kg) and increase in bronchoalveolar lavage (BAL) mucin content (ED 50≤ 0.1 mg/kg) induced by intratracheal (i.t.) LPS. Sch-527123 also suppressed the pulmonary neutrophilia (ED50=1.3
SCH-479833 or SCH 527123 also inhibited tumor growth. Histologic and histochemical analyses showed significant (P<0.05) decreases in tumor cell proliferation and microvessel density in tumors. lipopolysaccharide (LPS) administration. In rats, Sch-527123 suppressed the pulmonary neutrophilia (ED=501.8 mg/kg) and increase in bronchoalveolar lavage (BAL) mucin content (ED 50≤ 0.1 mg/kg) induced by intratracheal
lavage (BAL) mucin content (ED 50≤ 0.1 mg/kg) induced by intratracheal
(i.t.) LPS. Sch-527123 also suppressed the pulmonary neutrophilia (ED50=1.3
mg/kg), goblet cell hyperplasia (ED 50=0.7 mg/kg), and increase in BAL mucin
content (ED50<1 mg/kg) in rats after i.t. administration of vanadium pentoxide.
In cynomolgus monkeys, Sch-527123 reduced the pulmonary neutrophilia
induced by repeat bronchoscopy and lavage (ED50=0.3 mg/kg).
Other notes: Please test the solubility of all compounds indoor, and the actual solubility may
slightly differ with the theoretical value. This is caused by an experimental
system error and it is normal.

Caution

FOR RESEARCH PURPOSES ONLY.

NOT FOR HUMAN, VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
