Danoprevir (RG7227)

**Product Name:** Danoprevir (RG7227)  
**Cat. No.:** A4024  
**CAS No.:** 850876-88-9  
**Formula:** C35H46FN5O9S  
**M.Wt:** 731.83  
**Synonyms:** Danoprevir, RG7227, ITM-191  
**Target:** Proteases  
**Pathway:** HCV Protease  
**Storage:** Store at -20°C

≥32.6 mg/mL in DMSO; insoluble in H2O; ≥46.4 mg/mL in EtOH with ultrasonic

Please refer to the solubility information to select the appropriate solvent.

### Biological Activity

**Short Summary**  
HCV NS3/4A protease inhibitor

**IC₅₀ & Target**  
0.2-3.5 nM (HCV NS3/4A protease)

**Cell Viability Assay**

**Cell Line:** Huh7 cells harboring HCV replicon  
**Preparation method:** The solubility of this compound in DMSO is ≥32.6 mg/mL. General tips for obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

**Reacting conditions:** Antiviral assays: 100 nM to 5 pM; cytotoxicity assays: 1 mM to 5.6 nM
ITMN-191 displayed a high degree of specificity for its intended target. In replicon-bearing cells, ITMN-191 (3.7 nM-15 nM) promoted a 3.7 log10 reduction in replicon levels upon 14 days of in vitro treatment but did not clear HCV replicon from every cell. Treatment with ITMN-191 (45 nM) reduced HCV replicon RNA levels and completely cleared replicon RNA.

### Animal experiment

<tbody>
<tr>
<td>Dosage form:</td>
<td>Oral gavage, 30 mg/kg</td>
</tr>
<tr>
<td>Applications:</td>
<td>Danoprevir (30 mg/kg) administered to rats or monkeys shows that its concentrations in liver 12 hours after dosing exceed the Danoprevir concentration required to eliminate replicon RNA from cells.</td>
</tr>
<tr>
<td>Other notes:</td>
<td>Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.</td>
</tr>
</tbody>
</table>

Specific storage and handling information for each product is indicated on the product datasheet. Most APEX BIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
