Product Data Sheet

Chemical Properties

**Product Name:** Lenalidomide (CC-5013)

**Cas No.:** 191732-72-6

**M.Wt:** 259.3

**Formula:** C13H13N3O3

**Synonyms:** Revlimid, IMiD3, CC5013, CDC-501, CDC 501

**Chemical Name:** 3-(7-amino-3-oxo-1H-isoindol-2-yl)piperidine-2,6-dione

**Canonical SMILES:** C1CC(=O)NC(=O)C1N2CC3=C(C2=O)C=CC=C3N

**Solubility:** >13mg/mL in DMSO

**Storage:** Store at -20°C

**General tips:** For obtaining a higher solubility, please warm the tube at 37°C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

**Shopping Condition:** Evaluation sample solution: ship with blue ice
All other available size: ship with RT, or blue ice upon request

Biological Activity

**Targets:** TNF-α

**Pathways:** Apoptosis >> TNF-α

**Description:**

Lenalidomide (also known as CC-5013), an oral derivative of thalidomide, is an antineoplastic agent exhibiting antitumor activity through a variety of mechanisms, including immune system activation, angiogenesis inhibition, and direct antineoplastic effects. It has been extensively studied for the treatment of multiple myeloma and myelodysplastic syndrome as well as lymphoproliferative disorders including chronic lymphocytic leukemia (CLL) and non-Hodgkin lymphoma. According to recent studies, Lenalidomide promotes and restores immune system
function in CLL patients by inducing an overexpression of costimulatory molecules in leukemic lymphocytes to restore the humoral immunity and immunoglobulins production as well as improving the ability of T cells and leukemic cells to form synapses with T lymphocytes.

Reference:

Protocol

Cell experiment:

- **Cell lines**: Peripheral blood mononuclear cells (PBMCs)
- **Preparation method**: The solubility of this compound in DMSO is >10 mM. General tips for obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.
- **Reacting conditions**: 10 μM, 7 days
- **Applications**: The cells were incubated with the dye at 37°C for 10 min and treated for 7 days in RPMI culture medium with lenalidomide. Cells were surface stained with anti-CD4-PerCP and anti-CD25-APC, followed by intracellular staining with anti-FOXP3-PE. Lenalidomide inhibited the expression of CD4+CD25high CTLA-4+FOXP3+ cells. Incubation with lenalidomide significantly decreases expression of the T regulatory cell population after 7 days of culture. The drug decreased the percentage of CD4+CD25high cells expressing both CTLA-4 and FOXP3 from 25 to 12%.

Animal experiment [3]:

- **Animal models**: Male Sprague–Dawley rats
- **Dosage form**: Oral administration, 50 mg/kg or 250 mg/kg
- **Applications**: In the rat mesenteric window assay (RMWA), representative differences between vehicle and 50 or 250 mg/kg lenalidomide-treated rats were visualized by staining with an antibody against rat endothelium in bFGF-induced angiogenic windows. The induction of angiogenesis by bFGF was significantly inhibited by oral treatment of lenalidomide in a dose-dependent manner. Lenalidomide significantly decreased the percentage of
vascularized area from 5.16% in the control group to 2.58 and 1.69 in the 50 and 250 mg/kg group, respectively.

**Other notes**

Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.

**Product Validation**

Decrease of CRBN in the presence of Lenalidomide

Levels of CRBN,p21, and IRF4 in the presence of Lenalidomide and Pomalidomide

**Caution**

FOR RESEARCH PURPOSES ONLY.
Specific storage and handling information for each product is indicated on the product datasheet. Most ApexBio products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Short-term storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
