Product Name: GF 109203X
Revision Date: 01/10/2021

GF 109203X

Cat. No.: A8342
CAS No.: 133052-90-1
Formula: C25H24N4O2
M.Wt: 412.49
Synonyms: Gö 6850; Bisindolylmaleimide I
Target: TGF-β / Smad Signaling
Pathway: PKC
Storage: Store at RT

Solvent & Solubility

insoluble in EtOH; insoluble in H2O; \( \geq 20.6 \) mg/mL in DMSO

Please refer to the solubility information to select the appropriate solvent.

Biological Activity

Shortsummary
Protein kinase C, MLCK, PKG and PKA inhibitor

IC_{50} & Target
20 nM (PKCa), 17 nM (PKCβI), 16 nM (PKCβII), 20 nM (PKCy)

Cell Viability Assay

| Cell Line: | human platelets, Swiss 3T3 fibroblasts |
| Preparation method: | The solubility of this compound in DMSO > 20.6 mg/mL. General tips for obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months. |
| Reacting conditions: | human platelets: 500 nM, 1 min |

In Vitro
Applications:
GF 109203X inhibited diC8-stimulated P47 phosphorylation in human platelets. Half-maximal inhibition (IC50) for protein kinase C (PKC) is obtained at 190nM (1 min) in human platelets. GF 109203X inhibited collagen-triggered ATP secretion as well as α-thrombin- and collagen-induced platelet aggregation. GF109203X could inhibit EGF receptor transmodulation in Swiss 3T3 Cells. GF 109203X completely reversed the inhibitory effect of PDBu with a half-maxima effect at 0.9μm in Swiss 3T3 fibroblasts.

Animal experiment

<tr>
<td>Dosage form:</td>
<td>10 μg in 10% DMSO in saline by intraplantar (i.pl.) injection.</td>
</tr>
<tr>
<td>Applications:</td>
<td>GF109203X abolished the mechanical allodynia induced by BK (bradykinin).</td>
</tr>
<tr>
<td>Other notes:</td>
<td>Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.</td>
</tr>

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product datasheet.
