

Product Name: 8-Bromo-cAMP, sodium salt Revision Date: 01/10/2020

## **Product Data Sheet**

# 8-Bromo-cAMP, sodium salt

Cat. No.: B9000

CAS No.: 76939-46-3

Formula: C10H10BrN5NaO6P

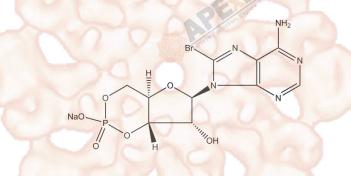

**M.Wt:** 430.09

Synonyms:

Target: MAPK Signaling

Pathway: cAMP

Storage: Store at -20°C

## Solvent & Solubility

≥43mg/mL in H2O

In Vitro

Preparing Stock Solutions	Mass Solvent Concentration	1mg	5mg	10mg
	1 mM	2.3251 mL	11.6255 mL	23.2509 mL
	5 mM	0.4650 mL	2.3251 mL	4.6502 mL
	10 mM	0.2325 mL	1.1 <mark>62</mark> 5 mL	2.3251 mL

Please refer to the solubility information to select the appropriate solvent.

## **Biological Activity**

Shortsummary	Cell-permeable cAMP analog that activates PKA		
IC <sub>50</sub> & Target		40.	
	Cell Viability Assay		
	Cell Line:	Growth-arrested AML193 cells	
	Preparation method:	The solubility of this compound in sterile water is 100 mM. General tips for	
In Vitro		obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes	
		and/or shake it in the ultrasonic bath for a while. Stock solution can be stored	
		below - 20 °C for several months.	
	Reacting conditions:	0 ~ 15 μM	

	Applications:	In growth-arrested AML193 cells, 8-Bromo-cAMP significantly increased DNA
		synthesis, with the ED50 value of approximately 10 $\mu M$ . At the doses over 2.5
		$\mu M$ , a toxic effect was observed. Moreover, the addition of 1 $\mu M$
		8-Bromo-cAMP synergized the IL-3-induced mitogenic response. In addition,
		8-Bromo-cAMP at the concentration of 1µM resulted in maximal Erk
319		phosphorylation. But the effect of 8-Bromo-cAMP on Erk phosphorylation was
	Ethos tre Vin	transient, with the maximal stimulation shown between 1 and 5 mins.
In Vivo	Animal experiment	
	Applications:

#### Caution

#### FOR RESEARCH PURPOSES ONLY.

#### NOT FOR HUMAN, VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
