

Product Name: Dryocrassin ABBA Revision Date: 07/30/2024

Product Data Sheet

Dryocrassin ABBA

Cat. No.: N2411

CAS No.: 12777-70-7 Formula: C43H48O16

M.Wt: 820.29

Synonyms:

Target: Natural Products

Pathway:

Storage: Store at -20°C

Solvent & Solubility

≥41 mg/mL in DMSO; ≥25.45 mg/mL in EtOH; insoluble in H2O

Mass Solvent 1mg 5mg 10mg Preparing Concentration In Vitro Stock Solutions 1.2191 mL 1 mM 6.0954 mL 12.1908 mL 1.2191 mL 5 mM 0.2438 mL 2.4382 mL 0.6095 mL 10 mM 0.1219 mL 1.2191 mL

Please refer to the solubility information to select the appropriate solvent.

Biological Activity

| Shortsummary | | |
|---------------------------|----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| IC ₅₀ & Target | | |
| In Vitro | Cell Viability Assay | |
| | Preparation method: | and the state of t |
| In Vivo | Animal experiment | All Control |
| | Applications: | |

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
