

Product Data Sheet

Amyloid Beta-Peptide (1-40) (human)

Cat. No.: A1124

CAS No.: 131438-79-4

Formula: C194H295N53O58S

M.Wt: 4329.86

Synonyms: Asp-Ala-Glu-Phe-Arg-His-Asp-Ser-Gly-Tyr-Gl

u-Val-His-His-Gln-Lys-Leu-Val-Phe-Phe-Ala-

Glu-Asp-Val-Gly-Ser-Asn-Lys-Gly-Ala-Ile-Ile-

Gly-Leu-Met-Val-Gly-Gly-Val-Val

Target:

Pathway: Neuroscience

Storage: Desiccate at -20° C

A Land and Landers for Arenda

Solvent & Solubility

insoluble in EtOH; ≥23.8 mg/mL in H2O; ≥43.28 mg/mL in DMSO

In Vitro

Preparing Stock Solutions	Solvent Concentration	1mg	5mg	10mg
	1 mM	0.2310 mL	1.1548 mL	2.3095 mL
	5 mM	0.0462 mL	0.2310 mL	0.4619 mL
	10 mM	0.0231 mL	0.1155 mL	0.2310 mL

Please refer to the solubility information to select the appropriate solvent.

Biological Activity

Shortsummary Amyloid precursor protein

IC₅₀ & Target

Cell Viability Assay

In Vitro

Cell Line:	CA1 pyramidal cells
Preparation method:	The solubility of this peptide in sterile water is >10 mM. Stock solution should
	be splited and stored at -80°C for several months.

	Reacting conditions:	200 nM, 20 min		
	Applications:	Aβ (1-40) reversibly increased IBa evoked at +20 mV. This increase w		
		observed for 6 of 11 cells and reached 1.74±0.06. The activation curve showed		
	BIO Dangan	that Aβ (1–40) caused an apparent voltage-dependent increase in IBa, with an		
		enhancement of IBa at the test potentials between 0 and +30 mV.		
	Animal experiment	C Entrange of the Control of the Con		
In Vivo	Animal models:	Male Charles River Wistar rats		
	Dosage form:	Intraperitoneal injection, 400 mg/kg		
	Applications:	A statistically significant decrease in basal ACh release (-30%) was detected		
		one week after the injection of A β (1-40). 30 days after the A β (1-40) peptide		
		injection, the decrease in Ach release was still statistically significant (-38%).		
		K+-stimulated ACh release was similarly affected by the treatment. A β (1–40)		
		treatment induced a significant decrease in the stimulated release on day 14		
		after lesioning (-43%).		
	Other notes:	Please test the solubility of all compounds indoor, and the actual solubility may		
	Reaction Explor	slightly differ with the theoretical value. This is caused by an experimental		
	Action of the second	system error and it is normal.

Caution

FOR RESEARCH PURPOSES ONLY.

NOT FOR HUMAN, VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
