CAL-101 (Idelalisib, GS-1101)

Cat. No.: A3005
CAS No.: 870281-82-6
Formula: C22H18FN7O
M.Wt: 415.43
Synonyms: CAL-101, CAL101, Idelalisib, GS-1101, GS1101
Target: PI3K/Akt/mTOR Signaling
Pathway: PI3K
Storage: Store at -20°C

Solvent & Solubility

≥80.2 mg/mL in DMSO, insoluble in H2O, ≥2.1 mg/mL in EtOH with ultrasonic and warming

Please refer to the solubility information to select the appropriate solvent.

Biological Activity

Shortsummary: PI3K inhibitor
IC50 & Target: 2.5 nM (p110δ)

Cell Viability Assay

Cell Line: CD19/CD5-positive CLL cells (&gt; 90%)
Preparation method: The solubility of this compound in DMSO is ≥10 mM. General tips for obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.
Reacting conditions: < 5 μM: dose-dependently inhibits the pro-survival effect of anti-IgM= 5 μM, 24h: inhibits 2.6% activity of anti-IgM; 5 μM, 72h: maximally reduces CLL
CAL-101 abrogated the pro-survival effect of anti-IgM in a dose-dependent fashion at lower dose levels (<5 μM). CAL-101 treatment at concentrations of >5 μM was maximally effective over the 72-hour time course in reducing CLL cell viability. At the 5 μM concentration, CAL-101 significantly decreased the mean (SEM) pro-survival effect of anti-IgM to 92.7% (2.6%) after 24 hours.

### Animal experiment

Specific storage and handling information for each product is indicated on the product datasheet. Most APEX BIO products are stable...
under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Short-term storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
