

Product Name: Dasatinib (BMS-354825)

Revision Date: 01/10/2021

Product Data Sheet

Dasatinib (BMS-354825)

Cat. No.: A3017

CAS No.: 302962-49-8

Formula: C22H26CIN7O2S

M.Wt: 488.01

Synonyms: Sprycel,dasatinibum,Dasatinib,BMS-354825,

BMS354825, BMS 354825

Target: Bcr-Abl

Pathway: TGF-β / Smad Signaling

Storage: Store at -20° C

Solvent & Solubility

≥24.4 mg/mL in DMSO; insoluble in EtOH; insoluble in H2O

Mass Solvent 1mg 5mg 10mg Preparing Concentration In Vitro Stock Solutions 10.2457 mL 20.4914 mL 1 mM 2.0491 mL 2.0491 mL 5 mM 0.4098 mL 4.0983 mL 10 mM 0.2049 mL 1.0246 mL 2.0491 mL

Please refer to the solubility information to select the appropriate solvent.

Biological Activity

Shortsummary	Src and BCR-Abl inhibitor	Src and BCR-Abl inhibitor	
IC ₅₀ & Target	0.6 nM (Abl), 0.8 nM (Src)	0.6 nM (Abl), 0.8 nM (Src), 79 nM/37 nM (c-Kit (WT)/c-Kit (D816V))	
	Cell Viability Assay	Age Polation.	
	Cell Line:	DU-145 and LNCaP cells	
In Vitro	Preparation method:	The solubility of this compound in DMSO is >10 mM. General tips for obtaining	
III VIGO		a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or	
		shake it in the ultrasonic bath for a while. Stock solution can be stored below	
		-20°C for several months.	

	Reacting conditions:	100 nM, 6 hours for inhibiting FAK phosphorylation 24 hours for decreasing
		cell-to-cell contact
	Applications:	Dasatinib almost totally abolished the levels of p-FAK at Tyr576/577 in DU-145
		cells, whereas p-FAK was not detected in LNCaP cells even though both cell
	Juncoun	lines expressed similar levels of total FAK protein. Treatment with 100 nmol/L
	Expoeire	dasatinib for 24 hours had no effect on cell viability and total cell numbers,
	Lieve Patection	although partial inhibition of cell proliferation due to G1 arrest was observed at
	A Para	48 and 72 hours. Besides, there was a substantial loss of cell-to-cell contact in
		DU-145 cells. This effect may be related to the decrease in levels of p-FAK and
		p-p130CAS.
	Animal experiment	
	Animal models:	Pdx1-Cre, Z/EGFP, LSL-Kras G12D/+, LSL-Trp53R172H/+ mice
	Dosage form:	Oral administration, 10 mg/kg, daily
	Applications:	There was no significant difference in survival between the different treatment
	The Unknown	groups. The median survival of vehicle-treated animals was 131 days
	P. Legion Export	compared with 127 days and 130 days for animals treated with dasatinib from 6
	Achlere 2 of	weeks and 10 weeks of age, respectively. Analysis of tumor burden in the mice
In Vivo		showed that all mice had invasive PDAC; however, the number of mice with
		metastases was reduced significantly in dasatinib-treated animals. The
		incidence of metastases was 61.1% in vehicle-treated animals compared with
		26.7% in mice treated with dasatinib from 6 weeks and 23.1% in mice treated
		with dasatinib from 10 weeks.
	Other notes:	Please test the solubility of all compounds indoor, and the actual solubility may
	.0	slightly differ with the theoretical value. This is caused by an experimental
	The count	system error and it is normal.

Caution

FOR RESEARCH PURPOSES ONLY.

NOT FOR HUMAN, VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
