Product Name: SLx-2119

Revise Date: 12/15/2020

SLx-2119

Cat. No.: A3825
CAS No.: 911417-87-3
Formula: C26H24N6O2
M.Wt: 452.51
Synonyms: SLx 2119; SLx2119; ROCK inhibitor; KD-025
Target: TGF-β/Smad Signaling
Pathway: ROCK
Storage: Store at -20°C

Solvent & Solubility

≥22.65 mg/mL in DMSO, ≥26.4 mg/mL in EtOH with ultrasonic and warming, insoluble in H2O

<tr>
<td>Preparation method:</td>
<td>Dissolved in DMSO to obtain a stock solution of 20 mM [1]. General tips for obtaining a higher concentration: Please warm the tube at 37°C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.</td>

**Reacting conditions:** 3 ml culture media containing 10 μM or 40 μM SLx-2119, 24 h.

**Applications:** SLx-2119 at 40 μM significantly reduces the mRNA levels of Tsp-1 and CTGF.

**Animal experiment**

**Animal models:** C57BL/6 mice.

**Dosage form:** 100, 200 or 300 mg/kg; administered every 12 h for 2 days via orogastric gavage.

**Applications:** KD025 (formerly SLx-2119) reduces infarct volume by 30% and 40% at 100 and 200 mg/kg dose levels. KD025 (200 mg/kg 90 min before distal middle cerebral artery occlusion (dMCAO)) significantly reduces the area of perfusion defect, suggesting that ROCK2 inhibition improves cortical perfusion during acute cerebral arterial occlusion.

**Other notes:** Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.

**FOR RESEARCH PURPOSES ONLY. NOT FOR HUMAN, VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.**

Specific storage and handling information for each product is indicated on the product datasheet. Most APEX-BIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Short-term storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product datasheet.
