TW-37

Cat. No.: A4234  
CAS No.: 877877-35-5  
Formula: C33H35NO6S  
M.Wt.: 573.7  
Synonyms: TW37, TW 37  
Target: Apoptosis  
Pathway: Bcl-2 Family  
Storage: Store at -20°C

### Solvent & Solubility

insoluble in H2O; ≥19.75 mg/mL in DMSO; ≥3.41 mg/mL in EtOH with gentle warming and ultrasonic

### Biological Activity

Shortsummary: Bcl-2 inhibitor, inhibits Bcl-2, Bcl-XL and Mcl-1

IC50 & Target: 0.29 μM (Ki) (Bcl-2), 1.11 μM (Ki) (Bcl-xL), 0.26 μM (Ki) (Mcl-1)

Product Name: TW-37  
Revision Date: 01/10/2021
induction (measured by Annexin V)

Applications:
The cell viability was assessed by the clonogenic assay. TW-37 resulted in a significant inhibition of colony formation of BxPC-3 and Colo-357 cells when compared with control. Besides that, TW-37 induced apoptosis in a dose- and time-dependent manner. In the Annexin V assay, the percentage of apoptotic cells increased from 5% to 6% in the control to 12% to 14% in both BxPC-3 and Colo-357 cell lines.

Animal experiment

Animal models: Female ICR-SCID mice bearing Colo-357 xenografts
Dosage form: Intravenous injection, 20 mg/kg/d
Applications: TW-37 treatment significantly inhibited pancreatic tumor growth in vivo. Western blot analysis showed that the expression level of Notch-1 was significantly lower in tumors from the TW-37-treated mice than those from vehicle-treated control mice. In addition, the expression of Jagged-1 and Notch-1 downstream target gene, Hes-1, was also down-regulated in TW-37-treated tumors.

Other notes: Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage
temperature. Shortterm storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
