Product Data Sheet

Chemical Properties

Product Name: BV6
Cas No.: 1001600-56-1
M.Wt: 1205.57
Formula: C70H96N10O8
Synonyms: N/A
Chemical Name: (S,S,2S,2'S)-N,N'-(2S,2'S)-(hexane-1,6-diylbis(azanediyl))bis(3-oxo-1,1-diphenylpropane-3,2-diyl))bis(1-((S)-2-cyclohexyl-2-((S)-2-(methylamino)propanamido)acetyl)pyrrolidine-2-carboxamide)
Canonical SMILES: O=C(CCCCCCCNC([C@@H](NC([C@H](C2CCCCC2)NC([C@H](C)NC=O)=O)CCC1)=O)CO=C(NCCCCCCNC([C@@H](NC([C@H]1N(C([C@H](C2CCCCC2)NC([C@H](C)NC=O)=O)CCC1)=O)CO=C(NCCCCCCNC([C@@H](NC([C@H]1N(C([C@H](C2CCCCC2)NC([C@H](C)NC=O)=O)CCC1)=O)C(C3=CC=C(C3)C4=CC=CC=C4)=O)[C@@H](NC([C@H]5N(C([C@H](C6CCCCC6)NC([C@H](C)NC=O)=O)CCC5)=O)C(C7=CC=

Solubility: ≥60.2785mg/mL in DMSO
Storage: Store at -20°C
General tips: For obtaining a higher solubility , please warm the tube at 37°C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.
Shopping Condition: Evaluation sample solution : ship with blue ice
All other available size: ship with RT , or blue ice upon request

Biological Activity

Targets: Apoptosis
Pathways: IAP
Description: BV6 is a selective inhibitor of IAP family with IC50 value of 7.2 μM when tested with H460 cells
IAP (inhibitor of apoptosis) is a family protein consists of 8 members and serves as endogenous inhibitors of programmed cell death. Until now, more than 5 human IAPs have been discovered includes XIAP, c-IAP1, c-IAP-2, NAIP, Livin and Survivin. It is reported that IAPs overexpression protects cells against a number of proapoptotic stimuli which enables IAPs play a pivotal role in promoting cancer cell survival [2, 3]. BV6 is an inhibitor of IAP family and often used as an adjuvant to sensitize the cancer cells to radiotherapy or chemotherapy. When tested with H460 NSCLC cells, pre-treatment BV6 sensitized the cells to radiation and increased the apoptosis in a time- and dose- dependent manner via reducing the expression of cIAP1 and XIAP [1]. In hematological THP-1 cells, pre-treatment with BV6 increased the CIK cells killing ability and the same results were achieved in solid malignancy RH30 cells [4]. In BALB/c mice model with transplanted abdominal cavities from donor mouse uterine tissue, intraperitoneally with BV6 repressed the advancement of endometriosis, cell proliferative activity via inhibiting the expression of IAPs [5].

Protocol

Cell experiment:

Cell lines HCC193 and H460 non-small cell lung cancer (NSCLC) cell lines.

Preparation method Limited solubility. General tips for obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Reacting conditions 37°C

Applications BV6 reduces the expression of cIAP1 and XIAP in HCC193 and H460 cell lines in a time and dose-dependent manner. BV6 also induces apoptosis in both HCC193 and H460 cell lines. In addition, BV6 prominently promotes the radiosensitivity of both HCC193 and H460 lung cancer cell lines.
### Animal experiment [3]:

<tbody>
<tr>
<td>Dosage form</td>
<td>Single i.p. injection of BV6 (10 mg/kg) twice weekly.</td>
</tr>
<tr>
<td>Applications</td>
<td>BV6 treatment for 4 weeks attenuates the intensity of IAPs expression and lowers the total number of lesions, the average weight and the surface area of lesions as compared with control group. Moreover, BV6 treatment decreases the percentage of Ki67-positive cells in the endometrial gland epithelia or stroma.</td>
</tr>
<tr>
<td>Other notes</td>
<td>Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.</td>
</tr>
</tbody>
</table>

### Caution

FOR RESEARCH PURPOSES ONLY.
NOT FOR HUMAN, VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

Specific storage and handling information for each product is indicated on the product datasheet. Most ApexBio products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Short-term storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
