Radotinib(IY-5511)

Cat. No.: B5846
CAS No.: 926037-48-1
Formula: C27H21F3N8O
M.Wt: 530.5
Synonyms: Apoptosis
Target: Apoptosis
Pathway: Bcl-2 Family
Storage: Store at -20°C

Solvent & Solubility

≥26.55mg/mL in DMSO

Biological Activity

Shortsummary: Bcr-Abl tyrosine kinase inhibitor

IC₅₀ & Target

Cell Viability Assay

Cell Line: Bone marrow cells (BMCs) from patients with AML
Preparation method: The solubility of this compound in DMSO is ≥ 26.5mg/mL. General tips for obtaining a higher concentration: Please warm the tube at 37 °C for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.
Reacting conditions: 1, 10, and 100 µM, 72 h, 37 °C
Applications: Radotinib is an inhibitor of BCR-ABL1 tyrosine kinase and has been approved
for the second-line treatment of chronic myeloid leukemia. In BMCs from patients with AML, radotinib increased cleaved caspase-3, caspase-7, and caspase-9 levels, resulting in increasing apoptosis. Radotinib also induced G0/G1 phase arrest and inhibited proliferating of BMCs from patients with AML.

**Animal experiment**

</thead>
<tbody>
<tr>
<td>Applications:</td>
<td>Patients’ response to radotinib is comparable to other 2nd-generation tyrosine kinase inhibitors. Radotinib is well tolerated and effective in chronic phase-chronic myeloid leukemia patients with resistance and/or intolerance to imatinib.</td>
</tr>
<tr>
<td>Other notes:</td>
<td>Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.</td>
</tr>
</tbody>

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Short-term storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
