Please refer to the solubility information to select the appropriate solvent.

Biological Activity

Shortsummary: cyclooxygenase inhibitor

IC50 & Target

In Vitro

Cell Viability Assay

Preparation method:

Animal experiment

Applications:

Specific storage and handling information for each product is indicated on the product datasheet. Most APExBIO products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Short-term storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
