

## 10X Running Buffer

### Introduction

This product is an electrophoresis buffer for the Tris-glycine system and is commonly used in protein-denaturing polyacrylamide gel electrophoresis experiments (SDS-PAGE). The product is optimally formulated on the basis of conventional methods for easy storage and operation.

### Protocol

Use distilled water or deionized water to dilute 10X Running buffer to 1X.

### Note

1. This product is a high-fold concentrate, when the ambient temperature is low, there may be crystal precipitation, which can be heated to help dissolve, and then diluted after complete dissolution.
2. The product is sealed and stored to prevent contamination.
3. This product is for scientific research use only.
