Product Data Sheet

Chemical Properties

Product Name: Caffeine
Cas No.: 58-08-2
M.Wt: 194.19
Formula: C8H10N4O2

Chemical Name: 1,3,7-trimethylpurine-2,6-dione
Canonical SMILES: CN1C=NC2=C1C(=O)N(C(=O)N2C)C
Solubility: Soluble in DMSO
Storage: Store at -20°C
General tips: For obtaining a higher solubility, please warm the tube at 37°C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shopping Condition: Evaluation sample solution: ship with blue ice
All other available size: ship with RT, or blue ice upon request

Biological Activity

Targets: Nature Products
Pathways:
Description:
Extracted from tea, coffee fruit; Store the product in sealed, cool and dry condition

Protocol
**Cell experiment:**

<table>
<thead>
<tr>
<th>Cell lines</th>
<th>Patient-derived AC-UPS01 and AC-RMS01 cell lines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preparation method</td>
<td>The solubility of this compound in DMSO is &gt;10 mM. General tips for obtaining a higher concentration: Please warm the tube at 37℃ for 10 minutes and/or shake it in the ultrasonic bath for a while. Stock solution can be stored below -20℃ for several months.</td>
</tr>
<tr>
<td>Reacting conditions</td>
<td></td>
</tr>
<tr>
<td>Applications</td>
<td>Caffeine significantly inhibited the patient-derived UPS and RMS cell lines in a dose-dependent manner with IC50 values of 2.02 ± 0.22 mM and 2.37 ± 0.48 mM, respectively. Addition of 0.3 mM or 0.6 mM VPA to varying concentrations of CAF enhanced efficacy against both the AC-UPS01 and AC-RMS01 cell lines.</td>
</tr>
</tbody>
</table>

**Animal experiment [3]:**

<table>
<thead>
<tr>
<th>Animal models</th>
<th>diet-induced obesity (DIO) mice</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dosage form</td>
<td>10 μg per mouse, i.c.v. administration</td>
</tr>
<tr>
<td>Applications</td>
<td>In diet-induced obesity (DIO) mice, administration of caffeine into mouse brain significantly increased the numbers of c-Fos+ cells in the PVN, Arc and DMH nuclei, suggesting that caffeine stimulated the activities of neurons in the hypothalamic nuclei involved in energy balance control. Caffeine reduced the adipocyte sizes of epididymal white adipose tissue, plasma triglycerides (TG) levels and improved glucose tolerance. Mice gained significantly less body weights than the controls on day 7.</td>
</tr>
<tr>
<td>Other notes</td>
<td>Please test the solubility of all compounds indoor, and the actual solubility may slightly differ with the theoretical value. This is caused by an experimental system error and it is normal.</td>
</tr>
</tbody>
</table>

Caution

FOR RESEARCH PURPOSES ONLY.

NOT FOR HUMAN, VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

Specific storage and handling information for each product is indicated on the product datasheet. Most ApexBio products are stable under the recommended conditions. Products are sometimes shipped at a temperature that differs from the recommended storage temperature. Short-term storage of many products are stable in the short-term at temperatures that differ from that required for long-term storage. We ensure that the product is shipped under conditions that will maintain the quality of the reagents. Upon receipt of the product, follow the storage recommendations on the product data sheet.
