

# Recombinant Murine Eotaxin/CCL11

### Information

| Gene ID             | 20292  |  |  |
|---------------------|--|--|--|
| Accession #         | P48298   |  |  |
| Alternate Names     | Small-inducible Cytokine A11   |  |  |
| Source              | Escherichia coli.  |  |  |
| M.Wt                | Approximately 8.4 kDa, a single non-glycosylated polypeptide chain containing 74 amino acids.  |  |  |
| AA Sequence         | HPGSIPTSCC FIMTSKKIPN TLLKSYKRIT NNRCTLKAIV FKTRLGKEIC ADPKKKWVQD ATKHLDQKLQ TPKP  |  |  |
| Appearance          | Sterile Filtered White lyophilized (freeze-dried) powder.  |  |  |
| Stability & Storage | Use a manual defrost freezer and avoid repeated freeze-thaw cycles - 12 months from date of receipt, -20 to -70 °C as supplied - 1 month, 2 to 8 °C under sterile conditions after reconstitution - 3 months, -20 to -70 °C under sterile conditions after reconstitution  |  |  |
| Formulation         | Lyophilized from a 0.2 µm filtered concentrated solution in PBS, pH 7.4.   |  |  |
| Reconstitution      | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Reconstitute in sterile distilled water or aqueous buffer containing 0.1 % BSA to a concentration of 0.1-1.0 mg/mL. Stock solutions should be apportioned into working aliquots and stored at ≤ -20 °C. Further dilutions should be made in appropriate buffered solutions. |  |  |
| Biological Activity | Fully biologically active when compared to standard. The biological activity determined by a chemotaxis bioassay using purified eosinophils is in a concentration range of 100-1000 ng/ml.   |  |  |
| Shipping Condition  | Gel pack.  |  |  |
| Handling            | Centrifuge the vial prior to opening.  |  |  |
| Usage               | For Research Use Only! Not to be used in humans.   |  |  |

# Components and Storage

| Components                       | 5µg | 100µg | 500µg |
|----------------------------------|-----|-------|-------|
| Recombinant Murine Eotaxin/CCL11 | 5µg | 100µg | 500µg |

Use a manual defrost freezer and avoid repeated freeze-thaw cycles

- 12 months from date of receipt, -20 to -70 °C as supplied
- 1 month, 2 to 8 °C under sterile conditions after reconstitution
- 3 months, -20 to -70 °C under sterile conditions after reconstitution

#### Quality Control

|           | A Company of the Comp | THO.   |
|-----------|--|--|
| Purity    | > 96 % by SDS-PAGE and HPLC analyses.  | P Edition of the Control of the Cont |
| Endotoxin | Less than 1 EU/μg of rMuEotaxin/CCL11 as   | determined by LAL method.  |

## Description

Murine CCL11 is belonging to the CC chemokine family. CCL11 was first purified from bronchoalveolar lavage fluid of guinea pigs. It was a strong and specific eosinophil chemoattractant in vitro. It can directly chemotactic for eosinophils, but not for monocytes or neutrophils. Murine CCL11 is approximately 63 % identical at the amino acid level to human CCL11. In addition, CCL11 also shows about 60 % amino acid sequence identity to human MCPs. CCR3 has been identified to be a specific CCL11 receptor.
